

# SCANDISPLAY

Mo5

## // Scan Display

Founded in 1996, Scan Display is a leader in the Southern African exhibition, events and retail display industry, specialising in award-winning exhibition stands, retail displays, and event and exhibition infrastructure.

## // Mo5

The Mo5 is a versatile solution for exhibitions, events, displays and retail applications.

Designed by German-based mo systeme, and manufactured under license locally by Scan Display, this product marries the best of first world technology and design with high quality production, at an affordable price.

The Mo5 is available for purchase or rental. Rental packages offer discounted rates for repeated use.

## // Features

The Mo5 folds away into a portable unit that can be transported on the back of a truck or trailer.

Set-ups and break-downs take only a few minutes. The gas springs make it easy to manage, while the wheels allow for easy manoeuvring.

The roof flap extends to a height of 3.3 metres, creating visible branding.

The Mo5 can be used both indoors and outdoors. The roof flap is spring-operated to ensure stability in strong winds.

Several Mo5 units can be interconnected.

Custom features can transform the Mo5: Shelving, AV, and storage facilities can be fitted into the unit.

## // Applications

The simplicity of the Mo5 makes it ideal for a variety of applications:

- o Information kiosks
- o Registration desks
- o Retail kiosks
- o Brand activations
- o Mobile bars
